

How to Setup VPN on Mac Devices

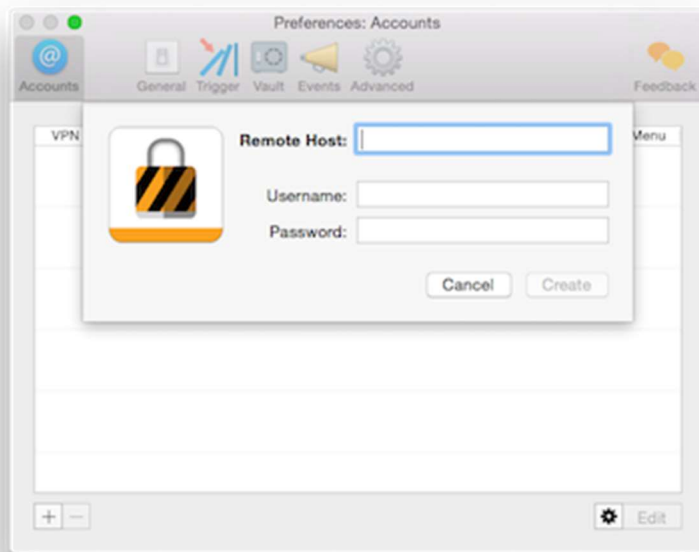

1. On mac Download Shimo click [here](#)
2. Open the downloaded file and follow the onscreen instruction to install Shimo
3. After installation click on the little Shimo icon to open **Shimo Preferences**

4. Open the **Accounts** tab and click on '+' to create a new **PPTP/L2TP** account

5. Enter your Remote Host **111.68.99.27** , Username **Student** and Password **student**.

6. You can easily connect your mac over the menu bar of macOS. You only have to click on the Account you just added.

Note: Please uninstall Shimo VPN after 30 days of trail period and install the application again.
